

Tsurumi flushes out two new products for the European market

Tsurumi Europe has added two submersible pumps to its product range, now available to the European market. These pumps are available from Tsurumi's European warehouse.

The LH4110W deep well pre-dewatering submersible pump features the largest pumping head in the Tsurumi Europe range and can pump water up to a maximum head of 218 meters. It has a maximum capacity of 2m³ /min, a motor output of 110kW and is equipped with a NSSHOU/3E mining cable for heavy-duty applications.

The LH4110W model doesn't lose any unique characteristics of the Tsurumi range, protecting Tsurumi's well-known qualities of reliability, durability, long life and easy to maintain products for high head dewatering. The pump can be installed in narrow spaces because of its cylindrical shape and the discharge flange is located at the top of the pump. The centre-flange construction enables the pump to be installed at the center of gravity in order to be lifted up and down without having to disconnect it.

The GSZ-75-4L submersible dewatering pump features the biggest pumping capacity in Tsurumi Europe's range with the maximum volume of 17.6m³ /min. It pumps over a distance of 38 meters and has a four pole motor for an increased life of wear parts. It's built with a 75 kW motor output and is equipped with a NSSHOU/3E mining cable.

This pump also remains true to the original GSZ range. The pump has a water jacket surrounding the motor casing, allowing a portion of water to flow around the motor to the side discharge. This feature helps the pump operate at low water levels for an extended period of time.

Tsurumi is one of the world's most experienced pump manufacturers. From its modern facility in Kyoto, Tsurumi produces more submersible pumps globally per year than any other pump manufacturer. There are currently over 1800 different pump models in the Tsurumi range, including semi-vortex, vortex, non-clog, cutter, contractor & dewatering, sewage & wastewater, aerators & blowers, decanting units and scum skimmers. Tsurumi operates on a worldwide basis with an extensive dealer network in Europe, North and South America, Asia, Australia and parts of Africa.
